Portfolio

EDUCATION

Government College of Engineering, Jalgaon — *Nov 2022 – May 2026*
B.Tech in Computer Science Engineering | CGPA: 8.25/10 — *Jalgaon, Maharashtra*

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Full Stack: React, React Native, Next.js, Tailwind CSS, TypeScript, Node.js, Express, REST APIs, PostgreSQL, MongoDB

AI/ML & NLP: LangChain, Gemini API, Whisper, Hugging Face Transformers, PyTorch

Cloud & DevOps: AWS, Docker, Git, GitHub, GitHub Actions, Linux

Blockchain: Solidity, Hardhat, ethers.js

PROFESSIONAL EXPERIENCE

Emendo AI — *Apr 2026 – Jun 2026*
Software Development Engineer Intern — *San Francisco, CA, USA (Remote)*

- Owned the **UX Revamp** initiative — redesigned onboarding flows, navigation, loading states, and reusable UI components using **React Native** and **TypeScript**, improving usability and interface consistency.
- Delivered **25+ engineering tickets** across frontend, backend, REST APIs, and **PostgreSQL**, independently managing multiple concurrent development tasks in a fast-paced startup environment.
- Developed production-ready features for both mobile and web applications using **React Native**, **React**, and **TypeScript**; resolved critical bugs and contributed to backend logic and database enhancements.
- Collaborated using **Git**, **GitHub**, **Notion**, feature branching, pull requests, and peer code reviews to deliver high-quality software following Agile development practices.

CDAC (Centre for Development of Advanced Computing) — *July 2025 – Sept 2025*
Cyber Security Intern — *Remote*

- Analyzed browser and network vulnerabilities using **Wireshark** and **OWASP** testing practices, and applied security hardening measures to improve safety of web applications in a controlled lab environment.

TECHNICAL PROJECTS

FloatChat – AI-Powered Ocean Data Discovery Platform repo live | *Next.js, LangChain, PostgreSQL*

- Developed **production-grade platform** for Government of India's ARGO Ocean Data program (**3M+ profiles, 4000+ active floats**) enabling efficient access to large-scale marine datasets
- Engineered natural language to SQL query system using **LangChain + Gemini API** with explainable outputs; built data pipeline converting NetCDF data into structured PostgreSQL tables with **vector-based semantic search**
- Improved system performance achieving **85%+ test coverage**, **34% faster load**, and **45% fewer re-renders** through optimized rendering and data handling

Sahaya – Blockchain-Based Disaster Relief System repo | *Solidity, Hardhat, ethers.js, React*

- Built decentralized system for transparent disaster relief fund distribution using **Solidity smart contracts** for campaign management, NGO verification, and fund tracking
- Implemented **role-based workflows** and OTP-based voucher redemption model, enabling secure and traceable transactions for beneficiaries and donors

EDURA – AI Lecture Transcription & Study Notes Generator repo | *Next.js, OpenAI Whisper, Gemini API, FFmpeg*

- Developed full-stack application for automatic lecture transcription and AI-generated study notes using **OpenAI Whisper** and **Gemini API**, reducing manual note-taking time by **50%**, supporting Hindi and English
- Designed modular backend with Next.js API routes and integrated **audio processing pipeline** using FFmpeg

ACHIEVEMENTS & COMPETITIONS

- **1st Place** – HackNex 24-Hour Hackathon | Delivered AI-powered prototype within 24 hours | Nov 2025
- **Runner-up** – Smart India Hackathon (Internal Round), GCOE Jalgaon & Yuva Mahotsav Research & Innovation Competition (District Level) | Sept 2025
- **Led teams** to Grand Finals in **5+ national hackathons**, achieving **Top 10/981** at TechEchelons 2026 (Web Development) and **Top 50/1700+** at Acropolis Prayatna 3.0 | Jan 2026 & Mar 2026
- **Solved 150+ algorithmic and data structure problems** across LeetCode, GeeksforGeeks, and CodeChef.
