EXPERIENCE

Emendo AI *Apr 2026 – Jun 2026*
Software Development Engineer Intern *San Francisco, CA, USA (Remote)*

- Owned UI/UX end to end on Emendo's production **React Native** app – redesigned onboarding, the project-creation flow, and loading states used by real users.
- Reviewed teammates' pull requests daily, catching bugs and inconsistencies before merge, and fixed a recurring **GitHub Actions** YAML issue that had been breaking CI for the team.
- Wrote UI test cases with **Appium** and **WebdriverIO** covering the ledger, docs, and revenue modules.
- Shipped **25+ tickets** tracked in **Notion** across frontend, backend, and **PostgreSQL**, to deliver high-quality software following Agile development practices.

CDAC (Centre for Development of Advanced Computing) *July 2025 – Sept 2025*
Cyber Security Intern *Remote*

- Analyzed browser and network vulnerabilities using **Wireshark** and **OWASP** testing practices, and applied security hardening measures to improve safety of web applications in a controlled lab environment.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, SQL

Full Stack: React, Next.js, React Native, Tailwind CSS, Framer Motion, Three.js, Redux Toolkit, Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Postman, Appium, WebdriverIO

Cloud & DevOps: Git, GitHub, GitHub Actions, Docker, AWS (EC2, S3), Redis, Linux

PROJECTS

BreakEven – Monte Carlo Rent vs. Buy Simulator repo live | *React, TypeScript, Web Workers, Recharts*

- Simulated rent-versus-buy outcomes across **3,000+ randomized market scenarios** with a **Monte Carlo engine**, running the computation in **Web Workers** to keep the browser's main thread unblocked
- Implemented mortgage amortization and percentile-based data visualizations using React and Recharts, without external financial libraries; fully client-side with URL-based state persistence and CSV export

FlashDrop – Scalable Limited-Inventory Reservation Platform repo | *React Native, TypeScript, Node.js, Express, PostgreSQL, Redis, Docker, JWT, AWS*

- Built a high-concurrency reservation platform for limited-time drops, designed to prevent overselling and duplicate reservations under concurrent traffic.
- Engineered transaction-safe inventory management using **PostgreSQL** row-level locking, constraints, and optimized query/index strategies.
- Designed for scalable traffic handling with **Redis** caching/rate limiting, connection pooling, and horizontal API scaling; planned production infrastructure with **Docker** and **AWS**.

FloatChat – AI-Powered Ocean Data Discovery Platform repo live | *Next.js, LangChain, PostgreSQL*

- Made public ARGO ocean float data (**3M+ profiles, 4000+ active floats**) queryable in plain natural language
- Engineered a natural language to SQL query system using **LangChain + Gemini API** with explainable outputs; built a data pipeline converting NetCDF data into structured PostgreSQL tables with vector-based semantic search, improving load time and reducing unnecessary re-renders

EDURA – AI Lecture Transcription & Study Notes Generator repo | *Next.js, OpenAI Whisper, Gemini API, FFmpeg*

- Shipped a full-stack tool for automatic lecture transcription and AI-generated study notes using **OpenAI Whisper** and **Gemini API**, with a modular Next.js backend and FFmpeg audio pipeline, supporting Hindi and English and cutting note-taking time roughly in half

EDUCATION

Government College of Engineering, Jalgaon *Nov 2022 – May 2026*
B.Tech in Computer Science Engineering | CGPA: 8.30 *Jalgaon, Maharashtra*

ACHIEVEMENTS & COMPETITIONS

- **1st Place** – HackNex 24-Hour Hackathon | Delivered AI-powered prototype within 24 hours | Nov 2025
- **Runner-up** – Smart India Hackathon (Internal Round), GCOE Jalgaon & Yuva Mahotsav Research & Innovation Competition (District Level) | Sept 2025
- **Led teams** to Grand Finals in **5+ national hackathons**, achieving **Top 10/981** at TechEchelons 2026 and **Top 50/1700+** at Acropolis Prayatna 3.0
- **Solved 150+ algorithmic and data structure problems** across LeetCode, GeeksforGeeks, and CodeChef.
